April 23, 2019

Shuangge (Steven) Ma, PhD
Professor of Biostatistics

**Biostatistics Shared Resource**

**Needs:** Most if not all cancer studies need statistical and bioinformatics support. Such support is provided to YCC members through the Biostatistics Shared Resource (BSR).

**Objectives:** To better understand the importance of biostatistics and bioinformatics analysis in cancer studies; to understand the support available by the BSR; and to know how to access the BSR.

Archana Shrestha, MPH, PhD
Director of Translational Research, Kathmandu University School of Medical Sciences

**Cervical Cancer Prevention in Low Resource Setting – An Experience from Nepal**

**Needs:** High burden of cervical cancer in developing countries; challenges of implementing cervical cancer prevention programs.

**Objectives:** To identify cervical cancer screening and treatment approaches in low resource settings; to understand opportunities and challenges of cervical cancer prevention; and to understand why single visit approach is effective.
