LEARNING OBJECTIVES

At the conclusion of this symposium, participants should be able to:

- ◆ Understand the history of disaster psychiatry and its basic tenets.
- ◆ Identify the phases of disasters, disaster mental health services, system issues and risk communication.
- ◆ Recognize early and late psychological impacts of disasters including distress, grief, PTSD, depression and resilience.
- ◆ Identify the basic elements of Psychological First Aid.
- ◆ Describe psychiatric roles in readiness, evaluation, and evidence-based treatment.
- ◆ Describe the Red Cross mental health role in disaster response and recovery, and how to participate in ARC Disaster Mental Health.
- ◆ Understand the range of psychiatric interventions during the different phases after disaster for children, adults, families, and responders.
- ◆ Explain the evidence base for psychotherapeutic and psychopharmacological interventions post-disaster.
- ◆ Describe self-care for first responders and health care professionals.
- ◆ Understand acute medical issues in the aftermath of disaster including identify medical problems, triage and first aid.
- ◆ Consider the legal and ethical issues in disaster mental health.
