Student Research Day 2024

[The Anlyan Center](#)

[Add event series to Calendar](#)

This annual event will showcase students' research through poster sessions and prize-winning research presentations during the Jill and Lee Goldman MD '73 Plenary Scientific Session. The event will also include the annual Lee E. Farr, MD Endowed Lectureship and the awarding of the John N. Forrest, Jr. Award for Mentorship in Medical Student Research.

The Office of Student Research encourages all to visit the students' poster session, which provides an opportunity to not only view the outstanding research of our students, but to ask questions of the students throughout the day.
