Announcements

Dr. Renelle Lim Appointed Director of Ocular Oncology

I am pleased to announce the appointment of Dr. Renelle Lim as an Assistant Professor of Ophthalmology and Visual Science at Yale School of Medicine and Director of the Ocular Oncology Program at Smilow Cancer Hospital, effective September 1, 2017.

Dr. Lim is an outstanding addition to our faculty. She graduated from medical school at the State University of New York Downstate Medical School. From there, she completed two separate fellowships at the prestigious Wills Eye Hospital. Her ocular oncology fellowship was under the guidance of Drs. Carol and Jerry Shields, who are the foremost eye tumor specialists in the world and have one of the largest clinical practices and research endeavors in the management of ocular tumors. She continued Wills Eye Hospital and completed a second fellowship in oculoplastic surgery. Her unique training will bring an outstanding level of clinical excellence to Yale and to the Ocular Oncology program at the Smilow Cancer Hospital.

Dr. Lim has clinical interests in uveal melanoma, eyelid and orbital tumors, eyelid reconstruction, and eyelid malposition. She will be available for consultation for all disorders involving cancer in the eye and periocular

region, as well as functional and cosmetic plastic surgery.

Anne Doerr Joins YCC

Please welcome Anne Doerr to Yale Cancer Center as Director of Media Affairs. Anne's position will focus on earned media, with the goal of raising our regional and national profile. She has a spectacular background in journalism and many years of successful earned media work, most recently at the Dana-Farber Cancer Institute. I am confident that her experience will help us to increase the awareness and exposure of the exciting research advances and outstanding patient care here at Yale Cancer Center and Smilow Cancer Hospital. Please join me in welcoming Anne to our team.

Notables

Edward Snyder, MD, Professor of Laboratory Medicine and Director of Transfusion Medicine, will receive the **President's Award** from the **American Association of Blood Banks** at this year's annual meeting in San Diego in October. Dr. Snyder is being recognized for his role as a founding member of the AABB Cellular Therapy Section and for his work in this area.

Dr. Roy Herbst has been named **Vice Chair of the SWOG Lung Committee**. Dr. Herbst will work collaboratively with Dr. Karen Kelly, Chair of the committee, to continue to push clinical trials for lung cancer forward and to develop more innovative trials for our patients.

Manoj Pillai, MD, Associate Professor of Medicine (Hematology), has received an **R01 grant** from the NIH to support his project "Deregulation of SF3B1 function by recurrent HEAT domain mutations." The research will study mechanisms by which mutations in the RNA splicing protein SF3B1 result in Myelodysplastic Syndrome (MDS), a pre-leukemic blood disease. The \$1.675 million grant also includes co-investigators **Karla Neugebauer, PhD** (MB&B) and **John Hwa, MD, PhD** (Cardiology).

Herta Chao, MD, PhD, Associate Professor of Medicine (Medical Oncology), received a **Medicine Service Line Award** from the **VA New England Healthcare System** in recognition of her successful leadership of the Oncology Clinical Trials Program at the VA Connecticut.

Philip W. Askenase, MD, Professor of Medicine (Immunology), has been awarded the **2018 Distinguished Scientist Award** by the **American Academy of Allergy, Asthma and Immunology (AAAAI)**. The award is presented annually to recognize scientific contributions to allergy and immunology research that have advanced the field and will improve patients' lives. Dr. Askenase is the first faculty member from Yale School of Medicine to achieve this recognition.

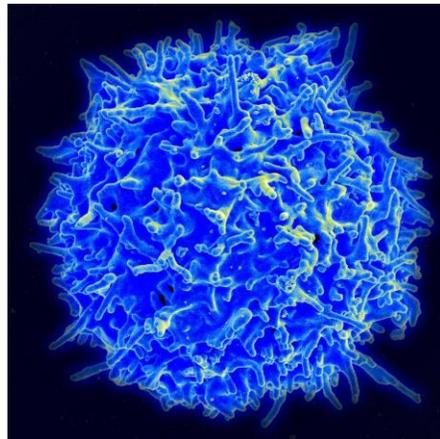

Dr. Lisa Fucito, Associate Professor in Department of Psychiatry and the Director of the Tobacco Treatment Service at Smilow Cancer Hospital, received the **Distinguished Faculty Supervisor Award** from the **Department of Psychiatry**, section of psychology, during their annual commencement ceremony. The award honors her as an outstanding supervisor for her work with fellows in Yale-New Haven Hospital's Behavioral Medicine placement.

When Sierra Hajek's mother received her breast cancer diagnosis earlier this year, Sierra knew that she wanted to help out in whatever way she could. Her mother Lara had been planning on riding in the upcoming Closer to Free ride, but chemotherapy

tasks as the Assistant Patient Services Manager of the inpatient Hematology and Bone Marrow Transplant unit. Patients on the unit are receiving mostly chemotherapy treatments and stem cell transplants, and are being monitored for any adverse events. Tanaz oversees the day to day management of the unit, and assists with chemotherapy orders and complex patients. Tanaz has been instrumental in improving the flow of discharges and admissions on NP 11.

"Patients can be with us as long as 3-4 weeks, depending on the treatment they are receiving and how they are responding," said Tanaz. "We get to know them really well, and they get to know us. It makes losing a patient that much harder, but I can't imagine myself doing anything else. It is such an honor to care for this patient population, and it makes you appreciate the little things in your own life."

Tanaz has been a nurse for 16 years and grew up at Yale, where she worked as a student nurse and stayed on after graduating. There are three different teams on the floor, Transplant, Hematology and the Advanced Practice Providers (APP's), and Tanaz commented that they all provide exceptional care, which the patients take notice of. "We have an incredible nursing team on the unit that provides great compassionate care and that is what makes it wonderful to be on NP 11."

Jill Williams, RN, Patient Services Manager on the floor, commented, "Tanaz is a special person who is extremely devoted to our unit and to our patients. She is someone who never forgets that each room is occupied by an individual with their own story. Additionally, her management skills are excellent and I can't imagine the unit without her, she is such an integral part of NP 11."

Funding Opportunities

treatments will prevent her from doing so. In order to show her support for her mother, Sierra decided to ride in her place.

If you're going to be out in the sun (especially for an extended period of time), you should be wearing a broad-brim hat to protect your face, ears, and neck from harmful exposure.

Though baseball caps can be tempting, they don't quite cover enough, according to Dr. David Leffel, a member of the Melanoma Program here at Smilow Cancer Hospital. "The majority of skin cancers are on the head and neck, so a brimmed hat that protects the ears as well as the nose is important," he said.

Sun Safety Tip

Wear broad-brim hats that ensure protection for your ears, nose, and neck!

An avid hiker, Leslie Riley wouldn't let treatment for her aggressive sarcoma keep her from doing what she loves. A week before surgery, though feeling weak from chemo and radiation, she climbed Camel's Hump Mountain in Vermont. Since surgery, she's back to riding her bike four times a week and has already reached another personal milestone: climbing Bear Mountain.

ACS-MRA Research for Proposals/Multidisciplinary Team Award

To facilitate research focused on prevention, risk, early detection, and management of short- and long-term immune-related adverse events (irAEs) associated with FDA-approved or late-stage development checkpoint cancer immunotherapies for melanoma and other cancers.
