Announcements

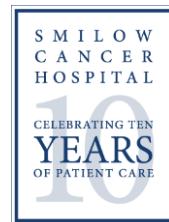

Smilow Cancer Hospital Celebrates 10th Anniversary

Tomorrow, October 26, marks 10 years since our first patient was treated at Smilow Cancer Hospital! We have so much to celebrate, and much to be thankful for over the last decade of growth, accomplishment, and achievement at Smilow Cancer Hospital, Yale Cancer Center, and at our Care Centers. The tremendous success in patient growth and care and advances in cancer treatment in care are all because of the outstanding physicians, scientists,

nurses, caregivers, and staff we have throughout our hospital, cancer center, and entire cancer enterprise. I thank each and every one of you and over the next year, I look forward to sharing many opportunities to reflect on our success, celebrate our progress, and plan for our future during a year-long campaign for Smilow10!

National Academy of Medicine

I am extremely proud to announce that four Yale Cancer Center members have been elected to the National Academy of Medicine (NAM), one of the highest honors in our field. Please join me in congratulating **Nita Ahuja, MD, MBA**; **Jorge Galán, DVM, PhD**; **Akiko Iwasaki, PhD**; and **David G. Schatz, PhD**, on this tremendous achievement. These distinguished faculty members are among 100 new members who were selected for

Smilow Luminary Awards

I was pleased to join Marna Borgstrom and Lori Pickens last week for the presentation of the first annual Smilow Luminary Awards of Excellence to nearly 50 of our exceptional staff members. The Awards honor people who consistently exceed performance expectations and deliver high-quality cancer care for patients, families and the health system throughout the year. The award categories are:

Community Service

Honors members of the organization that have aided the cancer community in extraordinary ways.

Optimization/Innovative Solutions

Honors members of the organization who develop or support developments in innovation or optimizing a system or process.

Leadership

Honors members of the organization that demonstrate leadership in patient safety and quality improvement.

Patient Experience

Honors members of the organization who go above and beyond to provide an excellent cancer care experience for our patients and families.

Our 2019 Awardees are:

Community Service

Jose DeJesus

Debra Nadaskay

Elena Ratner, MD

Lynn Savic, MD, a postdoctoral research fellow in Yale Interventional Oncology, received a **Radiological Society of North America Trainee Research Prize** for her work on Novel Molecular Imaging Biomarkers for Immune Response to Liver Cancer Therapy.

The Cancer Prevention and Control Research Program is proud to welcome **Harry R. Aslanian, MD**. Dr. Aslanian is a Professor of Medicine (Digestive Diseases) and serves as the Director of Endoscopic Ultrasound and of the Yale Advanced Endoscopy Fellowship as part of the Smilow Interventional Endoscopy Group. His clinical activities are focused on the diagnosis and management of pancreas and biliary disorders, including pancreas cysts, pancreas cancer, cholangiocarcinoma and indeterminate biliary strictures; dysplasia in the setting of Barrett's esophagus, the staging and treatment of early esophageal cancer, endoscopic palliation of strictures related to esophageal, pancreas and colon cancer; endoscopic resection of early esophageal, gastric, and colon cancer and the management of colon polyps. The majority of Dr. Aslanian's practice is related to the staging, diagnosis, or prevention of gastrointestinal cancers.

Research Highlights

Ting Yi was unexpectedly diagnosed with a cyst in her bile duct that needed to be removed immediately by surgery. "I have a PhD science background and did post-doctoral work at Yale, and so I had a lot of questions, very technical questions, for Dr. [Charles] Cha," she said.

During Ting's eight-hour surgery, Dr. Cha sat at a console and used a joystick to manipulate the three robotic arms plus a dual-channel camera arm, which provides a 3D magnification of the surgical site. He pressed a foot pedal to switch between the arms. "There's a misconception that robotic surgery is something automated," Dr. Cha said. "There is nothing automated about it."

Thank you to our team of physician scientists who

A Yale-developed drug shows promise as immune therapy for cancer

A therapy developed by Yale Cancer Center researchers stimulates immune cells to shrink or kill tumors in mice, according to a new study published in the *Journal of Experimental Medicine*. The therapy is effective alone or in combination with existing cancer immunotherapies, and it appears to have lasting effects, the researchers said.

The research team, led by Yale Cancer Center members **Akiko Iwasaki, PhD**, and **Anna Pyle, PhD**, examined whether a synthetic RNA molecule developed to fight viruses could also trigger an immune response against tumors. The molecule, called Stem Loop RNA 14 (SLR14), was specifically designed to activate a gene that detects viruses and other threats in cells.

The 2019 11th Annual Beach Jam for Breast Cancer, held in August at the Westbrook Elks Club, raised \$25,000 for patient assistance at the Breast Center at Smilow Cancer Hospital. The Beach Jam is attended by hundreds of people every year and has provided nearly \$200,000 for breast cancer patient support since its inaugural year, and we are very grateful for the tremendous effort and spirit that is poured into each event.

Yale Scientists Help Immune System Find Hidden Cancer Cells

Cancer cells are masters at avoiding detection, but a new system developed by Yale Cancer Center scientists can make them stand out from the crowd and help the immune system spot and eliminate tumors that other forms of immunotherapies might miss, the researchers reported in the journal *Nature Immunology*.

The new system reduced or eliminated melanoma and triple-negative breast and pancreatic tumors in mice, even those located far from the primary tumor source, the researchers report. This is an entirely new form of immunotherapy," said **Sidi Chen, PhD**, assistant professor of genetics and senior author of the study.

 On .@CPTVOnline's program Life Lessons tonight at 8pm our experts talk about #cancer care, including the use of complementary therapies and where to find emotional support.

 .@SidiChen shared his latest research on @NakedScientists podcast showing how a gene boost can unmask #cancer cells and help provide a target for the immune system.

 Good news for patients in Connecticut needing advanced #radiation treatment for #cancer! .@ynhhealth is partnering with @HartfordHealthC to bring @ProtonINTL's #protonbeam therapy to our patients.

 Watch our #cancer experts on .@CPTVOnline's program Life Lessons tomorrow at 8pm to learn about risk factors, early detection and latest treatments.

 Thank you to our Grand Rounds speakers today @PJAnanthmd talking about #pediatriccancer end of life care and Dr. Rachel Perry explaining #obesity and breaking the link to #cancer.

 Congratulations to Yale Cancer Center members .@NitaAhujaMD, Dr. Jorge Galán, .@VirusesImmunity Dr. Akiko Iwasaki, and Dr. David G. Schatz on their election to @theNAMedicine! It's one of the highest honors in medicine.

 Men get #breastcancer

Employee Profile: Danielle Welz

For a patient who has been newly diagnosed with cancer, the first visit with their care team can be overwhelming. Danielle Welz, Ambulatory Care Associate in The Breast Center at Smilow Cancer Hospital, tries to make that visit a little less daunting. She is often the first person a patient meets, and she strives to set a positive tone from the start.

In addition to making sure patients and their family members are comfortable and have everything they need, Danielle also takes vitals and assists with in-office procedures like punch biopsies, core biopsies, seromas, and aspirations.

"When patients come in they are nervous. They are here to find out more about their prognosis and care plan. Most of the time they leave with a sense of reassurance and it's a privilege to be able to play a small role in that," said Danielle. "We follow patients for many years, and you build relationships with them. It's an amazing feeling to see women come in after finishing treatment, and they are starting to look and feel like themselves again."

Danielle has been in her current role for two years, and enjoys working with this patient population. She commented that it is not always a good outcome, and everyone handles things differently, but she tries to be what each person needs in that moment. Camille Servodidio, Program Manager for Women's Oncology Services, commented, "Danielle delivers patient-centered care and listens to her patients. She is a strong patient advocate and demonstrates compassion and empathy in her daily interactions with patients."
