"Bioadhesive Nanoparticles for Skin Cancer Treatment and Prevention"

Michael Girardi, MD, FAAD
Professor of Dermatology

W. Mark Saltzman, MD
Goizueta Foundation Professor of Biomedical Engineering and Professor of Cellular and Molecular Physiology and of Chemical Engineering,

Needs: Understand the role and potential of nanoparticle technologies to enhance strategies for cancer prevention and therapy. Objectives: Understand local delivery of anti-tumor agents and learn how nanoparticles may be made biodegradable and bioadhesive to enhance drug delivery.

There is No Corporate Support for These Activities. Accreditation: The Yale School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Designation Statement: The Yale School of Medicine designates this live activity for 1 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Target Audience: YCC members, Smilow faculty, YSM, Nursing, Public Health Students. Faculty Disclosures: Ahuja- none, Girardi- Abbvie, Stadefy, Mallinckrodt, Actelion, Saltzman- unrelated. It is the policy of Yale School of Medicine, Continuing Medical Education, to ensure balance, independence, objectivity and scientific rigor in all its educational programs. All faculty participating as speakers in these programs are required to disclose any relevant financial relationship(s) they (or spouse or partner) have with a commercial interest that benefits the individual in any financial amount that has occurred within the past 12 months, and the opportunity to affect the content of CME about the products or services of the commercial interests. The Center for Continuing Medical Education will ensure that any conflicts of interest are resolved before the educational activity occurs. This course will fulfill the licensure requirement set forth by the State of Connecticut.
