Announcements

Improved Response for Genetic Profiling

The leadership at Smilow Cancer Hospital recognizes the increased importance that genetic profiling has on treatment decision making for your patients. I am pleased to report that our Tumor Profiling Lab, under the direction of Dr. Janina Longtine, can now return 50-gene panel results for your patients, both at the main campus and at our Care Centers, in a mean of 9 calendar days from receipt of the specimen in the lab. This is significant improvement over previous service times. In addition, the Oncomine panel, which includes 144 genes and also reports copy number variation and gene fusions, is available in a mean of 17 days. We know that time is continually a concern and Dr. Longtine is actively working with Dr. Rogerio Lilenbaum, Rich Lisitano, and Josh Forler to resource the lab for your patients.

When appropriate, please order the profiling for your patients through EPIC. If you have any questions on the service, please contact [Dr. Longtine](#).

LATEST ARTICLES:

Please join me in welcoming Tomer Avraham, MD, Assistant Professor of Plastic and

Reconstructive Surgery to the Breast Center team at Smilow Cancer Hospital. Dr. Avraham is a board certified plastic surgeon with specialized training in all forms of breast reconstruction, including tissue and implant based techniques.

Dr. Avraham has a particular interest in microsurgical techniques, which use a woman's own tissues for reconstructing her breast. These techniques include the DIEP flap, PAP flap, and others.

Dr. Avraham joins Yale from Mount Sinai Health System. He earned his Medical Degree from Tufts University School of Medicine and completed his internship and residency at New York University Langone Medical Center, before doing a fellowship in plastic and reconstructive surgery at Memorial Sloan-Kettering Cancer Center.

Global Oncology

Yale Cancer Center is continually working to strengthen our programs and outreach to better meet the needs of our membership. Dr. Anees Chagpar, Assistant Director for Global Oncology, and Dr. Yong Zhu, Assistant Director for Global Epidemiology, would like to better understand your global research efforts in oncology, and how the Center can support those efforts. Please take a few minutes to answer a brief online survey.

Annual Conclave Award Nominations

Yale Cancer Center is pleased to announce our call for nominations for our annual awards in the areas of excellence in research and clinical care. Each award will be announced at the Yale Cancer Center Conclave in January. The nomination deadline for YCC awards is **Friday, October 27**.

Yale Cancer Center Research Prizes: Research Prizes will be awarded in support of excellence in the areas of basic science, clinical research, translational research, and cancer prevention and control. Awards will be chosen in each area to recognize a paper that is considered to have had the greatest impact on the field this year. The applicant must be a current member of the Cancer Center and science in the publication must be cancer-focused. Please submit a PDF of your best publication (publication date from October 2016 to October 2017). To be eligible you must be either the first or last author of the publication. Email your publication to [Anna Raso](#).

Yale Cancer Center Award for Clinical Excellence: This award will be given to the physician who best exemplifies excellence in clinical care including super clinical skills, use of a patient- and family-centered approach to care, and inclusion of a multi-disciplinary care model. Nominee must be a current member of Yale Cancer Center. Please nominate yourself or a peer and send a brief nomination letter (one-page maximum) to [Anna Raso](#).

Yale Cancer Center Lifetime Achievement Award: Yale Cancer Center recognizes the achievements of one of our senior members through our annual Lifetime Achievement award. Please send nomination suggestions for the award to [Anna Raso](#).

LATEST POSTS:

Hospice care is an under-appreciated resource for older, terminally ill patients that could improve their quality of lives if accessed earlier, says a new Yale study. According to Dr. Thomas Gill from the Yale Program on Aging, hospice care is "designed to identify and alleviate bothersome symptoms and to provide comfort and other measures at the end of life," and it works best when used for a longer period of time.

Ruth McCorkle Oncology Advanced Practice Provider

Award: This annual award from Yale Cancer Center/Smilow Cancer Hospital recognizes the contributions of our Nurse Practitioner and Physician Assistant colleagues who contribute so much to oncology patient care. Please consider nominating yourself or a colleague for this award. Nominations are due for the Ruth McCorkle Award to [Cathy Lyons](#) by December 1.

Employee Profile: Andrea Brooks

Andrea Brooks, RN, works in the Women's Infusion Center on the first floor of Smilow. She has dedicated her 15-year nursing career to caring for patients with breast and gynecological cancers, administering chemotherapy and providing support. Many patients are receiving treatments that require them to schedule appointments on a weekly or monthly basis over a period of several years, and Andrea gets to know them very well.

"These women are oftentimes dealing with cancers in very sensitive areas, which can make them uncomfortable. I try to give everything of myself to each patient, to make sure they are taken care of and feel comfortable. It can be very draining, but at the same time it makes my job that much more rewarding," said Andrea.

Andrea commented that she has worked with some of the same nurses since she first started, and likes to point out that some of the nurses started the year she was born. "Needless to say, there is a lot of experience and knowledge on this unit that patients benefit from," said Andrea. "A lot of nursing comes naturally and is a part of who you are, but when you really stop to think about how much skill and

Earlier hospice care can improve end-of-life quality, according to a new Yale study.

Sailing Heals is embarking on a healing lunch and sail this Saturday at the Larchmont Yacht Club in Larchmont, New York! This organization provides free sailing trips to guests undergoing cancer treatment and their caregivers, through generous alliances with medical groups and corporate sponsors. Some members of our Smilow community will be setting sail this weekend at Larchmont-check back later for photos from their experiences.

knowledge is required, it makes you appreciate those around you."

Camille Servodidio, RN, MPH, OCN, CBCN, CCRP, NE-BC, Program Manager, Women's Oncology Services, commented, "Andrea is a clinically astute oncology nurse. She is efficient, compassionate, and willingly shares her knowledge and expertise with others. She has touched many lives of women who have been treated at Smilow and is a true asset to our team."

Development Update

Members of the board of Seymour Pink, a breast cancer support group based in Seymour, CT, visited the Breast Center at Smilow on September 13th to present their donation to support the new Scalp Cooling Program.

We are proud to announce that Yale and AstraZeneca Pharmaceuticals have established a new collaboration aimed at speeding translational and clinical research to develop a new generation of life-saving treatments for cancer.

Drs. Roy Herbst and Pat LoRusso will serve as Yale Co-Chairs of the committee overseeing the collaboration, which will draw on Yale's strong research capabilities and focus on lung cancer.

This partnership is a big step in the direction of understanding tumor growth and cancer as a whole, and we are proud to be embarking on this project with AstraZeneca.

Yale and AstraZeneca launch collaboration to develop new life-saving therapies.
