Yale School of Medicine*

**George Coleman,  
M.Ed.**  
*C.E.S.*

**Clare Irwin,  
Ph.D.**  
*EDC*

**Joanna Meyer,  
M.A.T.**  
*The Consultation Center  
Yale School of Medicine*

# Introductions

**PEER**  
Partnership for Early Education Research

# What we've been doing

- Organized results from first agenda setting workshop
- Applied for a new grant from Institute of Education Sciences
- Developed website and communication structures
- Developing data sharing agreements and supports for protecting data
- Planning to fund research agenda

# Brainstormed Research Topics

# Two Categories of Research

- Original research involving the **collection, analysis, and interpretation of data**
  - “Original” research
  - Data could be quantitative or qualitative
  
- Research involving the **review and/or synthesis of existing evidence**
  - Literature reviews
  - Meta-analyses

# Various Goals of Research

- To contribute to our existing knowledge
  - Basic and “bench” science
  - ***How does our research address gaps in the scientific literature?***
- To determine whether something happened or the extent to which it happened
  - Summative evaluation research
  - ***Was what we did effective?***
- To guide practice and/or policy for improving outcomes
  - Formative evaluation, continuous improvement, performance management
  - ***How do we use evidence to adjust practices and policies in real time?***

# Researchable questions

- What is a researchable question?
  - Reasonable
  - Appropriate
  - Answerable
  - Specific
- Where do researchable questions come from?
  - Questions, concerns, and values of stakeholders
  - Important issues in the field or research literature
  - Professional standards or guidelines
  - Views and knowledge of those with content expertise

# PEER's Initial Research Questions

***Aim 1: To understand children's school readiness as measured by the Connecticut Kindergarten Entrance Inventory (KEI).***

- What is the overall performance of children on the Connecticut KEI?
- Are there group differences in performance for gender, socio-economic status (SES), English as a second language status, and race/ethnicity?
- Are there district differences in performance?

## PEER's Initial Research Questions (cont.)

***Aim 2: To understand the use of assessment tools in the preschool setting.***

- Are there district and setting differences in how formative assessment tools are used in preschool?

## PEER's Initial Research Questions (cont.)

### ***Aim 3: To understand which teacher- and school-level factors predict kindergarten performance.***

- How do the teacher factors such as level of education, certification, number of years of teaching at the current level, and number of total years of teaching predict kindergarten performance?
- How do school factors such as class size, teacher-child ratio, and SES predict kindergarten performance?

# Research agendas

- What is a research agenda?
  - Identifies research priorities and questions for group
  - Is coherent
  - Leads to rigorous and relevant research that is actionable
  - May include current or future projects
- What does a research agenda look like?
  - Linear
  - Topical

# Example: Coherent, linear research agenda

- Topic: High school graduation
- Research questions:
  - What are the high school dropout rates for key subgroups of students?
  - What are the effects of alternative high school programs on students' degree completion and graduation?
- Studies:
  - Descriptive study of high school dropout rates for key subgroups
  - Descriptive study of re-enrollment rates in traditional high schools and education trajectories of re-enrollees
  - RCT of the impact of alternative programs for degree completion on high school graduation

# Example: Coherent, topical research agenda

- Topic: Mathematics learning
- Research questions:
  - What is the impact of grade 8 students' access to algebra I on their math achievement?
  - How do students with disabilities perform in math?
- Studies:
  - RCT of the impact of student access to algebra I in grade 8
  - Descriptive study of math education practices for students with disabilities
  - Descriptive study of math performance patterns for students with disabilities

# Research Topics Discussion

[Instructions]

**PEER**  
Partnership for Early Education Research

# Topic Caucus

[Instructions]

# Generate Research Questions

[Instructions]

**PEER**  
Partnership for Early Education Research

# Next Steps

## Research Agenda:

- We will refine research agenda based on today's information
- We'll seek your feedback (and feedback from partners not here) on agenda questions

## Other areas:

- Invite some practitioners from school and center-based ECE programs to complete a survey about assessment practices
- Secure funding to support the research agenda of PEER
- Organize an ECE conference for spring 2016

# Thank You!
