

Grand Rounds

Tuesday, October 26 at 12pm via Zoom

"Health Outcomes Research: bridging emerging medical technologies and real-world cancer care"

Michaela Dinan, PhD

Associate Professor of Epidemiology (Chronic Diseases)

Needs: There is a need for appreciation for differences in trial and real-world patient populations and an understanding of real-world data resources, methodologies and interpretation

Objectives: Be able to name differences between clinical trial and real-world cancer patient populations and name topics in oncology care that cannot be assessed within the context of a clinical trial.

"Gynecological Cancer: Translational Science and Pivotal Trials"

Gloria Huang, MD, FACOG

Associate Professor of Obstetrics, Gynecology & Reproductive Sciences

Needs: The treatment landscape for gynecological malignancies has undergone rapid transformation following the recent completion of pivotal trials in cervical, endometrial, and ovarian cancers, resulting in several new FDA-approved therapies.

Objectives: Describe and incorporate novel evidence-based therapies for the treatment of gynecological malignancies and explain indications for and clinical implications of germline and tumor molecular testing in gynecological cancers.
