## **NEW ADVANCES IN PROSTATE CANCER IN 2025**

### **William K. Oh, MD**

Director of Precision Medicine; Service Line Medical Director of Smilow Cancer Hospital at Greenwich Hospital

#### Needs:

1. Prostate cancer remains the leading cause of cancer and second leading cause of cancer death in men in the US. There have been many new advances in the biology, screening, diagnostic workup and treatment of prostate cancer. Given the rapid changes, an overview of these advances will help clinicians and researchers to keep pace with prostate cancer.

#### Objectives:

1. Review trends in epidemiology and screening of prostate cancer.
2. Understand new treatments in advanced prostate cancer and how that will improve survival.
3. Review how precision medicine including genomics and AI are being used to individualize treatment of prostate cancer.

William K. Oh, MD, is Director of Precision Medicine for Yale Cancer Center and Smilow Cancer Hospital, as well as Service Line Medical Director of Smilow Cancer Hospital at Greenwich Hospital.

Dr. Oh is a genitourinary oncologist with decades of experience caring for patients with prostate cancer. Before his appointment at Yale, Dr. Oh served as the Chief Medical Officer and Executive Vice President of the Prostate Cancer Foundation, where he focused on barriers to the delivery of care for prostate cancer nationally.

For more than a decade, Dr. Oh was Chief of Hematology and Medical Oncology, Deputy Director of the NCI-designated Tisch Cancer Institute and the Ezra Greenspan, MD Professor of Clinical Cancer Therapeutics at Icahn School of Medicine at Mount Sinai. He began his professional career at Dana-Farber Cancer Institute and Harvard Medical School, including roles as Clinical Director of the Lank Center for Genitourinary Oncology and Director of the Gelb Center for Translational Medicine.

Dr. Oh completed his undergraduate degree at Yale University, received his medical degree from New York University School of Medicine, and did his internship and residency at Brigham and Women's Hospital before his clinical fellowship in medical oncology at Dana-Farber Cancer Institute.
