

# Yale SCHOOL OF MEDICINE

## GENETICS DEPARTMENT SEMINAR SERIES

# From genetics to targeted therapeutics for kidney diseases

Dr. Greka is a leader in the field of ion channel biology and calcium signaling, pushing this area forward by defining mechanisms of cell survival and metabolic regulation in kidney disease. She is now using this fundamental understanding to develop precision therapies for difficult-to-treat diseases with a special interest in genetically defined disorders.

**Dr. Anna Greka, MD, PhD**

Associate Professor  
Harvard Medical School

**Host: Jessica Moore**

Greco Lab  
YSM Department of Genetics

**Tuesday, May 14, 2019**

11:30am - 12:30pm

**The Anlyan Center – N107**

The Genetics Calendar of Events can be viewed on-line at
