"PROTAC-mediated Protein Degradation: A New Therapeutic Modality"

Craig Crews, PhD

John C. Malone Professor of Molecular, Cellular, and Developmental Biology and Professor of Chemistry, of Pharmacology, and of Management; Executive Director, Yale Center for Molecular Discovery

Needs: Targeted Protein Degradation (TPD) is an emerging new therapeutic modality for treating cancer. Therefore, there is a need for the Yale Cancer community to learn about this new drug strategy so that they can incorporate it into their research and clinical activities.

Objectives: Learn about the history of the Targeted Protein Degradation (TPD) field and the unique advantages of TPD drugs relative to traditional inhibitor-based drugs.
