

Introductory Seminar

NEW: CENTER ON AGING AND CVS DISEASE

**WEDNESDAY, OCTOBER 21 2PM-3PM
HOPE 103 AMPITHEATER 315 CEDAR ST.**

CALLING ALL TRAINEES!

(Post-docs & Jr. Faculty)

This seminar will describe learning, educational and funding opportunities the new center will provide. The goals of the Center on Aging and CVS Disease are to not only garner interest and draw new young investigators into the field, but also orchestrate research collaborations among established investigators working in fields that relate to the basic science of aging and cardiovascular disease, and to develop education forums (a course and an annual symposium) on the topic. The center will be the first of its kind in the nation.
