

Renal Pathology & Electron Microscopy

The Yale Renal Pathology & Electron Microscopy Laboratory is known internationally for excellence in diagnostic renal pathology and electron microscopy services. Supported by a team of outstanding staff technologists, whose collective experience exceeds 30 years, we process more than 1200 specimens/year. The lab continually strives to improve the level of diagnostic excellence. We are committed to incorporating the latest scientific findings into our diagnostic workup and stay up to date on new developments in the field of renal and ultrastructural pathology.

Laboratory Services

- Specialized examination using light, immuno-fluorescence and Electron Microscopy
- Ancillary testing (C4d, Virus, Alport's and Amyloidosis panels)
- Timely and accurate results

Superior Customer Service

- Pathologists are available for consultation and patient care discussion
- Online access to biopsy reports using Yale Pathology RELAY web portal
- Dedicated Physician Liaison assigned to your account to assist your practice

Yale Pathology Labs leads the industry. We receive over 1,000 referrals each year from physicians worldwide.
