Grand Rounds

Friday, January 26, 9:00am
Blanche Tullman Lecture Series

Therapeutic Targeting of Epigenetic Mechanisms in Cancer

featuring

Scott A. Armstrong, MD, PhD
Chair, Pediatric Oncology, Dana-Farber Cancer Institute

55 Park Street Auditorium | Zoom Access
Continental breakfast will be available

Needs: Describe advances in cancer therapies that target epigenetic mechanisms.

Dr. Armstrong became the President of Dana-Farber/Boston Children's Cancer and Blood Disorders Center in 2019 and has been Chairman of the Department of Pediatric Oncology at Dana-Farber Cancer Institute since 2016. Dr. Armstrong earned his medical degree and his PhD from University of Texas Southwestern Medical School. He completed a hematology/oncology fellowship at Dana-Farber/Boston Children’s Cancer and Blood Disorders Center.

The major focus of his career has been on delineating the biology of childhood cancers and the development of new therapeutic approaches for children with cancer. His research program has focused on the mechanisms of leukemia development and the relationship between leukemia and normal hematopoietic stem cells.
