

# UPCOMING GOOD CLINICAL PRACTICE TRAINING

In a joint effort to help Yale faculty and research staff engaged in the conduct of clinical trials meet the requirement for **Good Clinical Practice (GCP) training**, the **Yale Center for Clinical Investigation (YCCI)** and **Human Research Protection Program (HRPP)** invited experienced GCP trainers to deliver several live training sessions in the upcoming months.

If you have previously completed a GCP training, completion of any of these live sessions will satisfy the requirement for the GCP continuing education. There are also two specialty courses available: one for faculty and staff engaged in social, behavioral, and educational research, and one focused on clinical investigations of medical devices.

**PLEASE NOTE:** *For active NIH awards, training must be completed no later than June 30, 2017. For new NIH awards and industry sponsored clinical trials, training must be completed at time of IRB protocol submission.*

## Good Clinical Practice Training for Faculty

**Wednesday, March 15, 2017 • 4:00 pm to 6:00 pm**

**Brady Auditorium, 310 Cedar Street**

*This is an initial GCP Training for Biomedical & Social, Behavioral, and Educational Research Faculty.*

*Light refreshments will be provided.*

## Essentials of Good Clinical Practice

**Thursday, March 16, 2017 • 9:00 am to 4:00 pm**

**Cohen Auditorium (NIHB Eo2), Child Study Center, 230 South Frontage Road**

*This is an initial GCP Training open to all members of the research community. Refreshments and lunch will be provided.*

### **Instructor: Brian Bennett, GCP Training Live**

**Brian P. Bennett** is currently in his 21st year with the pharmaceutical industry and is a recognized and respected name in the area of clinical research training and development. He was certified as a clinical research trainer by the Association of Clinical Research Professionals (ACRP) in 2002 and has successfully trained and educated countless professionals on various aspects of clinical research, including Good Clinical Practice (GCP), drug development, and FDA inspections. As such, Brian has established a reputation as a known talent throughout the country both as an independent speaker as well as through his faculty affiliations with ACRP and the Pharmaceutical Training Institute (PTi).

**TO REGISTER: Visit [www.yale.edu/training](http://www.yale.edu/training); browse courses by course owner; then select Human Subjects Research; select Good Clinical Practice**
