

Norm Table

Program Type - All Programs

The table below enables you to compare a percent correct score on the in-training examination with those of all first-year, second-year, third-year, and fourth-year residents. To use this table, locate the percent correct score in the first column and then find the corresponding percentile in the columns to the right. For example, if the score is 60%, then that score is at the 17th percentile of second-year residents. This means that 17% of second-year residents who took this examination obtained a lower score.
