

Behind the Scenes at Connecticut Innovations: How to apply successfully for funding from the Connecticut Bioscience Innovation Fund (CBIF)

An exceptional opportunity to hear directly from representatives of Connecticut Innovations

Are you working on an innovation that will positively impact human health?

The Connecticut Bioscience Innovation Fund (CBIF) provides up to \$500,000 per project to speed bioscience breakthroughs toward the market.

Learn about the stages of research supported . . .
the nature of collaborations important to moving innovations to market . . .
and how the Fund can help in this process.

This is a great opportunity for researchers working on innovations in:

bioscience	medical care	pharmaceuticals
biomedical engineering	medical devices	personalized medicine
health information management	medical diagnostics	other related disciplines

Panelists:

Claire Leonardi, MBA

Chief Executive Officer
Connecticut Innovations

Margaret Cartiera, PhD

Director, Bioscience Initiatives
Connecticut Innovations

Ariel S. Drew

Program Analyst, Bioscience Initiatives
Connecticut Innovations

***Friday, November 21, 2014 ~ 9:00-10:30am
Harkness Auditorium (SHM), 333 Cedar Street***

Walk-ins are welcome . . . there are plenty of seats available!

*Program officials will also speak about the recent renaming of the **Connecticut Stem Cell Program** as the **Regenerative Medicine Research Fund** and how this reflects its broadened interests in translational regenerative medicine.*
