Pathology Grand Rounds
Thursday, October 7th 12:30-1:30pm
Hosted by: Pallavi Gopal, MD, PhD

Bluma J. Lesch, MD, PhD
Assistant Professor, Department of Genetics, Yale School of Medicine

Intergenerational Epigenetic Inheritance of Cancer

Needs: Awareness of recent advances in epigenetics related to disease.

Objectives: Understand recent data about the role of the tumor suppressor Utx (Kdm6a) in tumorigenesis; Recognize the possible role of inherited epigenetic changes in disease susceptibility; Recognize different types of epigenetic marks and their relationship to gene expression.
