*Co-founder & Chief Strategy Officer*

***Possible***

Wednesday, February 24 - 5pm

Yale School of Public Health  
60 College Street, Room 216  
New Haven, CT

## Building Accountable Healthcare Systems in Nepal

Many focus on the usual suspects for clues on entrepreneurship – business leaders, start-up champions, and compelling authors – fewer look to the edges of society for inspiration and insight. Understanding the edges highlights the personality of entrepreneurs and keys to success more than formulaic strategies. Duncan Maru will explore common entrepreneurial themes – failure, bold/audacious creativity, pivots, learning and execution – in new ways.

Duncan Maru, MD, PhD, is Co-Founder of Possible. Possible has delivered care to over 225,000 patients through a public-private partnership with the Nepali government. Possible manages an integrated healthcare system in one of Nepal's most remote districts. The research arm, the Healthcare Systems Design Group, conducts implementation research studies through pragmatic study designs. Duncan is a faculty member at Harvard Medical School and received his MD and PhD from Yale University. In 2013, he was named a 'Young Star in Global Health' by Grand Challenges Canada.

Dinner will be served - Registration Required: [ihy-mentor-in-residence.eventbrite.com](http://ihy-mentor-in-residence.eventbrite.com)

**InnovateHealth Yale** is committed to one concept: change. Using the principles of entrepreneurship and innovation to promote health and prevent disease. InnovateHealth Yale is a home for those interested in creating innovative solutions to health challenges. [InnovateHealth.Yale.edu](http://InnovateHealth.Yale.edu)

This program is made possible by the generous support of the Donaghue Foundation.
