

Yale SCHOOL OF PUBLIC HEALTH

Chronic Disease Epidemiology

Seminar

“Understanding the Epidemiology of and Clinical and Physiological Response to Sub-concussive Blast Exposure”

Presented by

Eric B. Schneider, Ph.D.

Associate Professor of Surgery

Director, Yale Surgery Center for Health Services
and Outcomes Research

Repeated exposure to sub-concussive blast events among military service members in training has been associated with self-reported symptoms consistent with concussion / mild traumatic brain injury (TBI) in some individuals. This talk will discuss current efforts to understand the epidemiology of and to quantify clinical and physiological responses to measured sub-concussive blast overpressure exposure in human subjects.

Tuesday, October 12, 2021

12:00 PM

47 College St., Rm 106B

CDE 525 students are required to attend in person

CDE primary faculty may attend in person

All others are requested to attend via ZOOM
