“SERMs: Understanding how they work and how they differ from estrogens which have a pure agonistic effect on breast tissue”

There is no corporate support for this activity

This course will fulfill the licensure requirement set forth by the State of Connecticut

Thursday, December 17, 2015 - 4:00PM-5:15PM

Brady Auditorium, 310 Cedar St

LEARNING OBJECTIVES:

At the conclusion of this talk, the attendees will be able to:

1. Review basic differences between Estrogens and SERMs
2. Understand the interaction between Estrogen Receptors and different ligands
3. Review specific tissue responses to various ligands

NEEDS ASSESSMENT:

With the approval of different SERMs for various indications, there remains confusion amongst practitioners as to the tissue specific effects of these molecules. I hope to demonstrate their similarities and differences, specifically on normal breast tissue.

ACCREDITATION:

The Yale School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

CME CREDIT:

The Yale School of Medicine designates this live activity for 1 *AMA PRA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.

FACULTY DISCLOSURES:

It is the policy of Yale School of Medicine, Continuing Medical Education, to ensure balance, independence, objectivity and scientific rigor in all its educational programs. All faculty participating as speakers in these programs are required to disclose any relevant financial relationship(s) they (or spouse or partner) have with a commercial interest that benefits the individual in any financial amount that has occurred within the past 12 months; and the opportunity to affect the content of CME about the products or services of the commercial interests. The Center for Continuing Medical Education will ensure that any conflicts of interest are resolved before the educational activity occurs.
