**"The Epicentre Response to High Burden
of Infectious Diseases in Southwestern
Uganda"**

Uganda has the highest malaria incidence in the world and is ranked the 16th country in prevalence of tuberculosis (TB). The rural areas like Mbarara district bear the brunt of the diseases. In this seminar we will share recent evidences of decrease of malaria prevalence in some communities of Mbarara and explore the impact of malaria on morbidity of children. We will also discuss the challenges of TB diagnosis and look at possible future of TB treatments.

Tuesday, November 19, 2013

12:00 PM, LEPH 101

Host: M. Diuk-Wasser/G. Pitzer
