Announcements

Extended Care Clinic Opening

Smilow Cancer Hospital will open an Extended Care Clinic for our patients on the 12th floor in NP 12-3001 on Monday, April 3. The clinic will be available for our patients who need priority medical attention to promote continuity of care and to decrease our patients' use of avoidable emergency room services. Services will include pain management, hydration, and other acute care needs. Staffed by APPs, RNs, and PCAs, the Clinic will be available 7 days/week from 7am - 11pm. Patients will need to be referred by their provider or on call physician for care, and then should be sent to the 12th floor clinic. To refer a patient, call (203) 200-ECC1 (3221).

Please join the leadership of Smilow Cancer Hospital for an open house and ribbon cutting to celebrate the opening of the Extended Care Clinic on Tuesday, March 28th from 3:30-5:00pm. Official remarks will be made at 4:00pm.

Accrual and Screening to LAPS and Lung-MAP Trials

I am pleased to report that in our third year of Lead Academic Participating Site (LAPS) funding for the NCI's National Clinical Trials Network (NCTN), Yale Cancer Center is ranked #10 nationally in accrual to the program. In addition, we are 3rd nationally in screening to the Lung-MAP trial. Congratulations to our entire Clinical Trials Office team, especially to

Dr. Howard Hochster, Dr. Roy Herbst, and Rebecca Lillian for their leadership on these initiatives.

U.S. News Best Hospitals - VOTE NOW

Voting remains open on [Doximity](#) for the annual Best Hospitals survey in *U.S. News & World Report*. If you have not taken the opportunity to vote, please login and vote and support cancer services at Yale New Haven Hospital. Please take the time to do this, and to recognize the great team that you are a part of each day at Smilow Cancer Hospital and at our Care Centers.

Dr. Shams Shakil Joins VA Cancer Center

Dr. Michal Rose is pleased to announce the appointment of Dr. Shams Shakil, Assistant Professor of Medicine (Medical Oncology). Dr. Shakil will care for patients at the VA Cancer Center in West Haven and will participate in the Yale Cancer Center clinical trials program, along with the Smilow Cancer Hospital Gastrointestinal Cancers Program. He joins us from Markey Cancer Center at the University of Kentucky. Dr. Shakil received his medical degree in Bangladesh, and later conferred to MD by the University of The State of New York. He completed his residency and fellowship at Brookdale University Medical Center, New York.

Medical Oncology Retreat

Despite the snowy March weather, over 60 members of our medical oncology team met in Westbrook last Friday for the third annual Medical Oncology Retreat, hosted by Dr. Roy Herbst and Dr. Michal Rose. Priorities for the section of medical oncology, clinical trial accrual, and research updates filled the day's agenda, along with special presentations from Dr. Babar Khokhar, Yale Medicine's Chief Clinical Transformation Officer and Ms. Marna Borgstrom, President and CEO of Yale New Haven Health System. The day concluded with time for networking and discussion and dinner with guest, Jim Fyfe, actor and comedian.

LATEST POSTS:

Researchers at Yale Cancer Center recently published an article in the Journal of the National Comprehensive Cancer Network calling attention to racial disparities in the treatment of breast cancer. Through an analysis of over 8,000 patients, the team found that black and hispanic women with breast cancer were less likely to receive gene expression profiling than white women, which has significant implications for treatment decisions.

"Understanding and mitigating racial barriers to gene expression testing in women with breast cancer is imperative to narrowing disparities in breast cancer outcomes," said Cary Gross, MD, lead author of the study.

Notables

Dr. Stephanie Halene and **Dr. Manoj Pillai** were both promoted to the positions of Associate Professor of Medicine (Hematology).

Heather Purvis RN, BSN, OCN has been appointed as **Assistant Patient Service Manager** of the Smilow Care Centers in Guilford, Orange, and North Haven. Heather brings with her many years of experience caring for medical oncology and hematology patients in different hospitals in the New York City area most recently, at Memorial Sloan Kettering and Westchester Medical Center.

Members of Yale Cancer Center and the University College of London Cancer Center are participating in the *at the limits* oncology symposium sponsored by *The Lancet* this week in London. Co-chaired by Roy Herbst, presenters from Yale included, **Joann Sweasy** on *DNA Repair in Cancer*, **Mark Saltzman** on *Using Nanoparticles for Drug Delivery*, **Susan Kaech** on *Fattening up T Cell Responses to Cancer and Infection*, **Roy Herbst** on *Personalized Immunotherapy for Advanced NSCLC*, and **Melinda Irwin** on *Examining the Effect of Exercise and Weight Loss on Cancer Biomarkers, Treatment Side Effects, and Quality of Life*.

A new study published in the medical journal *Cancer* details the financial burdens facing cancer patients in the United States. The study examined U.S. national health surveys from 2011 to 2014 and found that 32% of people recently diagnosed with cancer changed their prescription drug use because of financial burdens, compared with 21% of people with no cancer history.

"If the cost of drugs prescribed by your physician creates a barrier to taking them, or will result in major financial burdens, it is important to speak with your physician," said Amy Davidoff, PhD, MS, Senior Research Scientist at the Yale School of Public Health and an author of the study.

Development Update

Over 450 guests filled Woodwinds in Branford on Saturday, February 25 for the Melissa Marottoli Hogan Foundation **Gala for a Cure**. The event is held in memory of Melissa Marottoli Hogan and supports translational research in the Thoracic Oncology Program at Smilow Cancer Hospital. The Gala raised over \$150,000 that evening.

Dr. Scott Gettinger addresses and thanks the guests at the Gala.

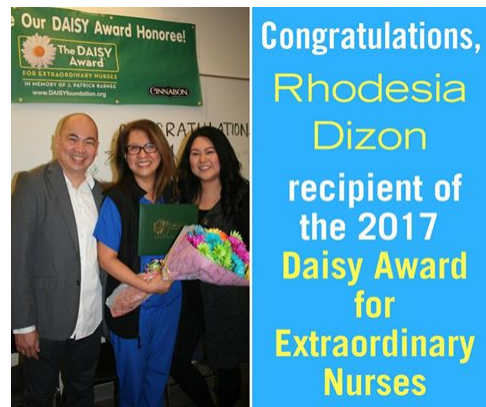

Employee Profile: Carrie Pyer

"If the cost of drugs prescribed by your physician creates a barrier to taking them, or will result in major financial burdens, it is important to speak with your physician."
-Dr. Amy Davidoff

This year's Daisy Award recipient, believe it or not, actually goes by the name "Daisy" - Rhodesia (Daisy) Dizon has been with the radiation oncology team since 2016 but has worked for Yale New Haven Hospital for 10 years. Daisy was nominated for this huge honor for her dedication to her patients.

One colleague mentioned a time Daisy was consoling a patient regarding a difficult decision she had just made for her mother's treatment - "I wish I had a camera to showcase the level of connection and compassion that existed between Daisy and this lady," she said. Thank you for your compassion and care Daisy, and congratulations on your achievement!

Colon cancer takes more than 50,000 lives annually, is the third most common cancer in the United States, and the second leading cause of cancer death in the US. When caught early, however, colon cancer is highly treatable, with chemotherapy and

surgery options both improving quality of life and extending survival time.

March is colorectal cancer awareness month, so it's an ideal time to spread the word about colon cancer and encourage friends and colleagues to schedule a screening. Learn more about colon cancer screening

Follow Yale Cancer Center on Twitter

Carrie Pyer, RN, is Nurse Coordinator for the Hematology/Oncology Clinic on the seventh floor of Smilow Cancer Hospital. She has been in this role for three years, but has been with Yale in various departments since 1982. She works with patients that have been newly diagnosed with malignant blood disorders, or are coming to the practice for the first time. As the initial point of contact for patients, she is responsible for answering any questions and making sure they are referred to the appropriate disease team.

When a patient arrives for their first visit, Carrie has already spoken with them and arranged for the necessary multidisciplinary pieces to be in place. This can include social work, dieticians, tobacco treatment, or someone to discuss financial or insurance issues. She meets with patients on the day of their first visit to complete the nursing assessment and provide educational materials. Once they have met with their doctor, Carrie coordinates any additional testing, or refers them on for treatment and informs them of the drugs they will be receiving, and the side effects they may experience.

As a 17-year breast cancer survivor, Carrie knows what patients are going through when they receive their diagnosis. "It's a very difficult time, as this is all new to them and they are dealing with the unknown. I try to alleviate any anxiety by making sure they know exactly what to expect," said Carrie. "I have been in their shoes and know how scary that first appointment can be for the patient and for their family as well." Carrie also helps to prepare the agenda for the weekly Tumor Board Meetings and communicates often with the physicians.

Maureen McGlennon, RN, Patient Services Manager for NP 7, commented, "Carrie has a nurturing quality and makes our patients feel comfortable before and during their first visit. Carrie works with multiple disciplines to coordinate care smoothly and timely and patients have acknowledged the great experience that was enhanced by Carrie's professional and personal approach."
