

Grand Rounds

February 18, 2020 | 12:00 p.m. | Smilow Auditorium, 55 Park Street

Amer Zeidan, MBBS

Associate Professor of Medicine
(Hematology), Yale School of Medicine

Immune Checkpoint Inhibition in Myeloid Malignancies

Needs: *There are unmet needs for AML and MDS and ways to improve outcomes for patients with immune checkpoint blockades need to be discussed.*

Objectives: *Learn about the unmet clinical needs facing patients and the obstacles to success of immune checkpoint blockade in myeloid malignancies.*

Michael Cecchini, MD

Assistant Professor of Medicine (Medical
Oncology), Yale School of Medicine

Novel Approaches to Target DNA Repair in Gastrointestinal Cancers

Needs: *There is a growing need to discuss the advances in DNA repair and DNA damaging therapies in gastroesophageal and colorectal cancers.*

Objectives: *Understand the rationale for synergy between angiogenesis inhibitors and PARP inhibitors and the safety and efficacy of Olaparib/Ramucirumab.*
