A Comprehensive Cancer Center Designated  
by the National Cancer Institute

With the generalization of genetic testing and wide use of gene panel testing that allows for checking the status of multiple genes at the same time, there has been an outburst of knowledge regarding inherited cancer syndromes. This has also led to a better understanding of the nature and behavior of the susceptibility of some individuals that do not have any detectable inherited mutations to cancer risk. The purpose of this program is to assist in identifying individuals who may be at high risk and/or have an inherited cancer syndrome, as well as understand the current approaches for cancer prevention in these patients.

## Continuing Medical Education Yale CME

The Yale School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. Yale School of Medicine designates this live activity for a maximum of *1 AMA PRA Category 1 Credit(s)*<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
