

THE DEPARTMENT OF GENETICS
YALE UNIVERSITY SCHOOL OF MEDICINE

SEMINAR PROGRAM

***“The Role of Inherited p53 Mutations in
Cancers”***

Dr. Arnold Levine, PhD

Professor Emeritus, Institute for Advanced Study

Host: Dr. Daniel DiMaio

Professor, Genetics

Dr. Arnold Levine is one of the co-discoverers of the gene and protein p53. p53 is the most commonly mutated gene in cancer, with over 50 percent of all human tumors containing a p53 mutant protein.

**Tuesday, December 12, 2017
11:30am - 12:30pm
The Anlyan Center – N107**
