

Department of Psychology 2013-2014 Colloquium
Series

Neal E. Miller Memorial Lecture

"The functional anatomy of face
processing in the primate brain"

Leslie G. Ungerleider, Ph.D.
National Institute of Health

Dr. Ungerleider is an experimental psychologist and neuroscientist, currently Chief of the Laboratory of Brain and Cognition at the National Institute of Mental Health. Dr. Ungerleider is known for introducing the concepts of the dorsal (where) and ventral (what) streams, two pathways of information processing in the brain that specialize in visuospatial processing and object recognition, respectively.

Wednesday, September 18th
4:00 PM
Location TBD

A reception and question/answer session will follow
in the first floor lounge in Kirtland Hall.
